

20TH JANUARY 2007

Vic Kuzmovich & the VT Naiad Team

To Vic, Matt, Guy and all of you on the team at VT who worked so hard for us in late November & December '06 and early Jan '07 during the retro fitting of the Naiad at anchor stabilization system we now enjoy on MY PARADIGM, a most heartfelt thankyou.

I can't sing your praises enough for committing to such a big job in such a short period of time and pulling the job together in such a professional manner.

To start from the "*ground up*" as it were on our Benetti hull No. 2 with a system that had not been used before with this size and manufacture of yacht was no small undertaking. None of the team faltered at any stage, despite all the outside pressures which came to bear. I think Matt's leadership of his team was a big factor in achieving the job on time and to spec. In my opinion the guys have been by far and away the best contractors I have dealt with in a long time.

An engineering refit of this kind is necessarily stressful under any conditions and to have your guys perform they way they did gave me immense confidence in the job being completed properly without my direct influence and freed me to devote my time and energy to other projects which needed attention.

We have since had the owner aboard in the Caribbean which is well renowned for it's extremely roly anchorages and he couldn't be more pleased with the performance of the system both underway and especially at anchor.

The difference in the performance of the yacht is most profound and I think the end result probably comes close to exceeding expectations of what we had dared hope for.

Once again, thanks to all the boys and the team at VT Naiad. You have a customer for life. Well done.

Best Regards,
Capt Garrath Getley
